

Quick Start Guide

This Quick Start Guide will help you get started with your new Epik Learning tab™. For additional assistance, visit: support@epiklearning.com Tel. 888-999-1244

1

Before Starting

Make sure a Wi-Fi connection is available. We recommend using a Google Account (or Gmail) with your tablet if you do not have one. This guide will help you sign up for a free Google Account.

Charging

1. Before first use, we recommend charging the tablet for 6 hours.
2. Plug in the included AC adapter.
3. Connect the USB cable from the AC adapter to the tablet.

2 Turn Power On

1. Press and hold the **POWER** button for 3 seconds until the lighted screen appears.

3 Language Selection

1. Scroll through the languages and highlight your preference.
2. Tap **Next**.

4 Connect to Wi-Fi

1. Tap your Wi-Fi Network name.
2. If your Network has a password you will be prompted to enter it.
3. Tap **Connect**.

5

Got Google?

1. If you already have a Google Account, enter your email and tap **NEXT**, and enter your password, then skip to step **#9**.
2. If not, tap **SKIP** and you can set one up.

6 Create a Google Account

1. Enter your **first** and **last name** in the appropriate boxes. Tap the right arrow to continue.

7

Username and Password

1. Enter your desired username and tap the right arrow to continue.
2. Enter a password in the first box and repeat it in the second box.
Tap the right arrow to continue.

8

Recovery phone

1. Follow the instructions on screen if you would like to set up recovery phone.
2. If not, you can do this later by logging in to google.com.

9

Setup Payment Info

You may choose to add a credit card to your account for digital purchases. This can be done later at wallet.google.com.

10

Google Services

1. Uncheck any services that you do not wish to have active on your tablet then tap the right arrow to continue.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR) information:

This Tablet PC meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Tablet PC (FCC ID: ZFN-ELT0801) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification when properly worn on the **body is 0.73 W/kg**. This device was tested for typical body-worn operations with the back of the handset kept **00cm** from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a **00mm** separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
